

## RS TOWER 42 double width rolling tower

### ✓ Professional use

- Suitable for indoor and outdoor use
- Up to 14.2 metres working height
- Double width rolling tower, large work surface area
- Also available in Safe-Quick® version

## RS TOWER 42 Double width rolling tower For any professional task

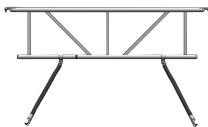

The RS TOWER 42 is an all-in rolling tower. Perfect for the professional. The clamped claw-brace connections make the RS TOWER 42 super-strong. The scaffolding takes you to a maximum working height of 10.20m outdoors and 14.20 metres indoors.

Circular welded anti-slip rungs make the frame super-strong and 100% reliable. With wide frames of 1.35 metres and a maximum load of up to 250kg per platform, this scaffolding is perfect for two-person usage. The platform is available in the lengths: 1.85 or 2.45. The optional Safe-Quick® GuardRail, gives you all-round protection and safety.

### Double width rolling tower, large surface area

Wide rolling towers with frames of 1.35 metres. This means that two platforms can be positioned next to one another. This creates a larger working area.

### Always safe with Safe-Quick®

With the innovative Safe-Quick® GuardRail, you install a guardrail before you even set foot on the platform. All-round safety at every level.

### Strong connections

The clamped claw-brace connections make the RS TOWER 42 super-strong. The connections are not welded and can take a knock or two.

### Wooden platforms and toe boards

The system is supplied with wooden platforms and toe boards. Reliable and solid.

### Double-braking wheels

Your rolling tower is stabilised with double-braking wheels. Individually adjustable to up to 10cm.
