SAFETY
HA20 RTJ

Working in partnership with its customers to create the HA20 RTJ, each component, each detail has been designed to achieve an optimum level of performance to reach 3 objectives: to maximize your productivity, to look after your profitability and to ensure operators' safety.

The HA20 RTJ, that's the safest choice to guaranty your success.

1

PRODUCTIVITY
HA20 RTJ

SAFEST CHOICE

On construction sites, efficiency is a key factor of success. Particular attention has been paid to the productivity of the **HA20 RTJ** to guarantee first-rate performance... and so always have a head start.

INCREASED PRODUCTIVITY THANKS TO A SMART DESIGN

➤ EXCEPTIONAL LIFT SPEED

Lift speed to full height in only **48 seconds** thanks to simultaneous movements.

➤ INTUITIVITY AND EASE OF USE

Ergonomic upper control box allowing a more intuitive operation.

Practical and functional tool tray equipped with several compartments to always have the right tools at hand.

➤ OPTIMIZED WORKING ENVELOPE/WEIGHT RATIO

The best ratio working height / horizontal outreach / up and over clearance / weight to maneuver and work efficiently in hard-to-reach places.

➤ EASY TO DRIVE AND TRANSPORT

Easy and economic transportation: thanks to the ability to fold the jib under the boom, one truck = 2 HA20 RTJ.

Very compact (6.5 x 2.9 m), light and stable machine to be driven smoothly and safely.

Weight:

- RTJ model: 9.1 T
- RTJ PRO model: 9.6 T

2

RELIABILITY
HA20 RTJ

SAFEST CHOICE

The **HA20 RTJ** has been designed to withstand day-to-day wear whilst retaining its performance over time. Thus, all the sensitive parts have been specially treated to be extremely durable, even in the toughest environments. This reduces your cost of ownership.

A ROBUST MACHINE WHICH STANDS THE TEST OF TIME!

➤ LIFE CYCLE OF PARTS AND COMPONENTS X3

Special treatment of the pivot pins, bushes and fastening hardware to ensure optimum prevention of corrosion.

➤ IMPACT-PROOF STEERING RODS

Protection system inside the chassis to avoid potential damage from impacts.

➤ FLIP-TOP COVER AND TOOL TRAY MADE WITH HIGH-RESISTANCE COMPOSITE MATERIALS

Thanks to an innovative bumper process developed for the automobile industry, the flip-top cover and tool tray with shape memory retention are highly shock resistant.

➤ PROTECTED WEIGHING SYSTEM

Well protected, the weighing system does not come into contact with the ground avoiding potential damage from impacts.

➤ HIGH QUALITY COMPONENTS

“ We have chosen highly qualified and reliable suppliers, who have an established network, meaning they can supply spare parts anywhere in the world. ”

3

MAINTENANCE HA20 RTJ

SAFEST CHOICE

Success is not just required on the construction site: maintenance is also very important. From the self-diagnostic system to easy access to all components, everything has been designed to reduce downtime and your costs of ownership.

LESS MAINTENANCE, MORE WORKING TIME

➤ MODULAR ASSEMBLY

Easily removable modular basket and hood.

➤ EASY ACCESSIBILITY

Swing out engine tray enabling direct access to key components.

➤ EASY DIAGNOSTICS

Pre-diagnosis screen.

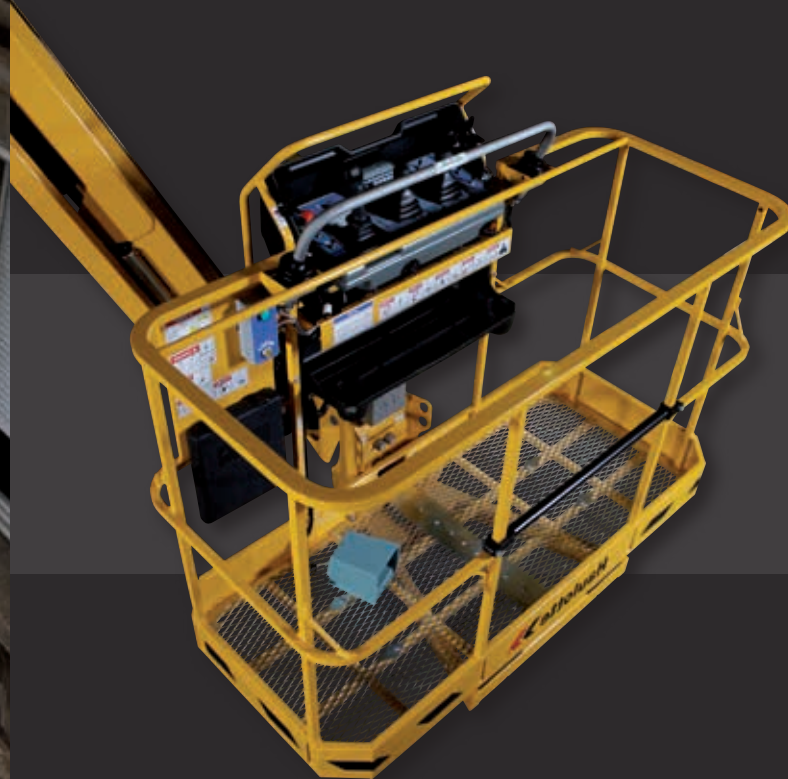

Haulotte Diag system designed to provide a complete and immediate diagnosis, in the workshop or on-site.

4

SAFETY
HA20 RTJ

SAFEST CHOICE

Easy to use and peace of mind, the new **HA20 RTJ** offers the highest innovation regarding your workers' safety. It protects your operators on the construction site without compromising productivity.

SAFE AND EFFECTIVE DRIVING IN ALL CONDITIONS

➤ EXCELLENT MANOEUVRABILITY

When driving, the joystick can be operated with only one hand, so the other can hold the safety rail.

This patented equipment reduces crushing risks while maintaining excellent productivity (standard or as an option according to the model).

Smooth lifting and driving: the working area is reached with maximum precision.

➤ MAXIMUM VISIBILITY

Drive at maximum speed with the jib in an elevated position allowing excellent visibility of the working area.

➤ COMFORT AND SIMPLICITY OF OPERATION

7 harness points all around the basket more convenient for operators to hook on and to work safely.

Excellent acoustic comfort: up to 2 times quieter thanks to the variable motor speed.

HA20 RTJ MADE FOR ALL APPLICATIONS

The HA20 RTJ is a multipurpose machine that suits many types of applications.

BUILDING WORKS

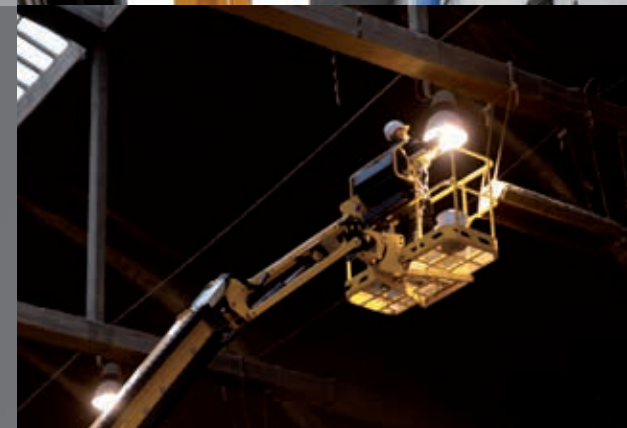

Steelwork, curtain walls, cladding, masonry, sandblasting, painting...

FINISHINGS

Plumbing, electrics, air conditioning heating, insulation, painting...

MAINTENANCE

Plumbing, electrics, air conditioning, heating, insulation, industrial cleaning...

TIONS

| MINING OPERATIONS

| MAINTENANCE AND RENOVATION OF HISTORIC MONUMENTS

| LANDSCAPING AND TREE SURGERY

HA20 RTJ AN OFFER OF 2 MODELS

Haulotte offers 2 models, providing a machine perfectly suited for all your needs and your working conditions.

HA20 RTJ

- Jib
- 2 wheel steer
- 14 x 17.5" cured-on solid tires
- 355° turret rotation

HA20 RTJ PRO

- Jib
- 4 wheel steer
- High clearance 22.5" cured-on solid tires
- 360° continuous turret rotation
- Oscillating axle
- Haulotte ACTIV'Shield™ Bar

MANY OPTIONS AVAILABLE

Key options available to meet your requirements:

> VISIBILITY

- 70 W working light
- Flashing light

> PRODUCTIVITY

- Power to platform
- Air-line platform
- Modular large basket 2.44 x 0.91m
- Lateral swing door entry gate
- Hydraulic generator 3.5 kW or 12 kW
- Non-marking tires

> SAFETY

- Haulotte ACTIV'Shield™ Bar
(Available as an option on the RTJ / Standard on the RTJ PRO model for Europe and Latin America only)

> CLIMATE AND ENVIRONMENT

- Cold weather kit: -10 °C / -25°C
- Hot weather kit: hydraulic oil + hydraulic oil cooler
- Biodegradable hydraulic oil
