

NEW!

4400-POWER

Within the 4000 series Altrex offers the 4400-POWER folding/rolling tower for both interior and exterior work. This compact folding/rolling tower has basic dimensions of 0.75 x 1.85 m.

- The platforms can be adjusted to a variety of working levels, allowing work to be carried out at various heights with ease
- Wooden platforms with anti-slip profile and windlock security system provide extra security
- Comfortable access, because the rungs are equipped with an anti-slip profile and a rung distance of 28 cm
- Optional: separately supplied set of collar tubes enables extension
- With Mobile Safety QR-code on the platform for access to the assembly and use

**Now also with Safe-Quick®:
4400-S-POWER see page 30**
