

RS TOWER 41 single width rolling tower

✓ Professional use

- For indoor as well as outdoor use
- Up to 10.20 metres working height
- Single width rolling tower, for narrow spaces
- Also available in Safe-Quick® version

RS TOWER 41 Single width rolling tower. Rolling tower for any professional task

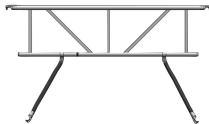

The RS TOWER 41 is an all-in rolling tower. Perfect for the professional. The clamped claw-brace connections make the RS TOWER 41 super-strong. The scaffolding takes you to a maximum working height of 10.20m. Both indoor and outdoor.

Circular welded anti-slip rungs make the frame super-strong and 100% reliable. With narrow frames of 0.75 metres and a maximum load of up to 250kg per platform, this scaffolding is perfect for using in narrow spaces. The platform is available in the lengths: 1.85 or 2.45. The optional Safe-Quick® GuardRail, gives you all-round protection and safety.

Single width rolling tower, for narrow spaces

Narrow rolling towers with frames of 0.75 metres. This means that one platform can be used per level. Narrow towers are perfect if you are a bit short on space.

Always safe with Safe-Quick®

With the innovative Safe-Quick® GuardRail, you install a guardrail before you even set foot on the platform. All-round safety at every level.

Strong connections

The clamped claw-brace connections make the RS TOWER 41 super-strong. The connection is not welded and can take a knock or two.

Wooden platforms and toe boards

The system is supplied with wooden platforms and toe boards. Reliable and solid.

Double-braking wheels

Your rolling tower is stabilised with double-braked wheels. Individually adjustable to up to 10cm.
